Summary

Final-year BSc student in Computer Science and Engineering with hands-on experience in modern web development technologies. Proficient in Next.js, React, Tailwind CSS, NestJS, and PostgreSQL, with a strong focus on building scalable and high-performance web applications. Seeking a Web Developer role to apply technical skills in real-world projects and contribute to a dynamic development team.

Projects

ExhibitPro

Exhibition & Event Management Platform (Admin Section)

Sep-Aug
2025

Key contributions:

- Collaborated in a team to build a full-stack Admin Panel using Next.js, React, NestJS, and TypeScript
- Designed a modern, responsive UI using Tailwind CSS with neumorphic design principles
- Developed admin features including user approval, venue management, and dashboard analytics
- Implemented input validation using JavaScript (frontend) and DTOs (backend)
- Enforced role-based access control using Guards to restrict functionality
- Secured authentication with JWT token generation and bcrypt password hashing

Link Back-end: <https://github.com/CodePoint-46615/exhibitPro-backend/tree/alif>

TaskLink (Back-end)

Freelance platform

Dec 2025

Key contributions:

- Developed the backend of a freelance platform using .NET Core with a 3-tier architecture
- Implemented job search and filtering based on budget and other criteria
- Enabled core features such as job posting, bidding, contract creation, and billing logic (without external payment gateway integration)
- Automated workflows, e.g., closing bids once a contract is created
- Built analytics features including job summaries and total earnings/payment insights
- Added job recommendation logic to display the latest 5 relevant jobs
